

Testimonial: Jackson Rockefeller

“My name is Jackson Rockefeller, and ABC’s Apprenticeship program has completely changed the course of my life.

At first, I wasn’t sure what I wanted to do after high school. I tried college for a semester, but it didn’t feel right—I felt lost and unmotivated. Thanks to my mom and a connection at a job fair, I was given the opportunity to join ABC’s electrical apprenticeship program. From my very first day on the job site, I knew I had found something meaningful.

The apprenticeship gave me structure, purpose, and skills I could use for life. I’ve been able to work, earn, and grow without the burden of student debt. In just over a year, I’ve already bought my first truck and started building toward bigger goals like owning a home and moving up to become a foreman or labor manager.

To me, apprenticeship means opportunity. It means having a clear path forward, building discipline, and gaining pride in the work I do every day. Without ABC, I wouldn’t be where I am today—and I recommend this program to anyone searching for a rewarding career.”
