

Testimonial: Nichole Jacobinas

“My name is Nichole Jacobinas, and the ABC Apprenticeship program has completely transformed my life.

Before joining, I worked at a golf course and was planning to enlist in the Navy as an electrician. When that fell through, I wasn’t sure what direction to take—until a mentor introduced me to ABC and encouraged me to apply. That step changed everything.

Through apprenticeship, I discovered a career that fits my strengths. With hands-on learning and the support of instructors and classmates, I’ve grown not only as an electrician but as a leader. I’ve received safety awards, joined the student council, and even spoken with state legislators to advocate for apprentices like me.

Most importantly, ABC has given me stability and the ability to provide for my growing family. I’m currently expecting my first child, and I know I can offer them a better future because of the opportunities this program has given me.

What started as something I thought I was “supposed to do” has become something I truly love. ABC didn’t just give me training—it gave me confidence, purpose, and a vision for my future, including the dream of one day starting my own company.”
